

Overview of Asian Capital Markets

With above average growth rates and a significant consumer base that is fueling economic expansion, the countries of Asia are seeing unprecedented developments in their financial landscapes and are providing investors and issuers a great opportunity to take advantage of high capital returns. However, given the relative infancy of many of the local financial markets, there are still risks in Asia for a new investor to consider. This course mines through the landscapes of the major players in Singapore, Hong Kong, Sydney, Shanghai, and Mumbai with an eye towards understanding what type of financial instruments are being used by both domestic and International players to take advantage of the Asian growth story.

Available Session(s):

| | | |
|--------------------------------------|-----------------|------------|
| 16-Oct-2008 -- 06-Nov-2008 | New York | USD \$1575 |

Targeted Audience

All finance professionals who have an interest in learning about the Asian financial markets.

Special Offer

Clients who register for this course will receive a complimentary 6 month subscription to the Financial Times and FT.com. The Financial Times is the world's most respected financial newspaper providing a broad assessment on finance, business and the industrial sector. Subscriptions will start within 6-8 weeks of the application process, and are limited to one per client. For questions about your subscriptions call 800-628-8088 or email uscirculation@ft.com. US and Canada enrollees only.

Advance Preparation

No advance preparation required.

Prerequisites

Preference for students with a basic background in financial instruments such as equities, bonds, and currencies. Knowledge of derivatives would be a plus but not a prerequisite for this course.

Learning Objectives

Students will be able to:

- Demonstrate a practical understanding of the financial markets in terms of current profile and historical development
- Develop an appreciation for current market practices in the individual economies including the use of cash and derivative instruments by market participants
