

CSAP - Corporate Finance & Valuation Fundamentals Module

This Corporate Finance course focuses on the primary tasks of the corporate treasurer or financial analyst. The program covers the key principles of corporate finance including project analysis and capital budgeting, the time value of money and various valuation concepts. Plus, participants are challenged to decide a firm's optimal capital structure. The basics of discounted cash flow shows how to estimate a weighted average cost of capital to use as a discount rate appropriate to a particular company or project. Alternative valuation techniques are also examined.
