

Option Combination Strategies - Online

Building on the Derivative Instruments course, this intensive intermediate level course explores the different types of option products, including options on equities, indexes, futures, foreign exchange and interest rates. It illustrates option combination trading strategies, including horizontal and vertical spreads and volatility plays.

This course replicates the content from lesson 3 of Options - Online

This is an asynchronous eLearning course that can be accessed 24/7 from any internet enabled computer. Subscription period for this course is 90 days.
