

Accounting for Mergers & Acquisitions

This one-day intensive course presents an analyst's approach to accounting for business combinations. The program's objectives focus on the application of financial accounting and federal income tax principles for projecting earnings accretion/dilution and cash flows of the post-combination entity. Several of the items discussed are unique to accounting for business combinations and are typically excluded in other financial accounting courses.

Targeted Audience

This course is suggested for financial analysts/managers, bankers, strategic planning professionals, financial decision-makers in corporations, corporate finance lawyers, corporate finance accountants, financial management consultants, market regulators and professionals interested in the accounting analysis of M&A transactions.

Special Offer

Clients who register for this course will receive a complimentary 4-month subscription to FT.com. The Financial Times is the world's most respected financial newspaper, providing a broad assessment on finance, business and the industrial sector. The move to the electronic version follows an ongoing review of our environmental responsibilities as a global business and as part of the Pearson group. FT.com also has features that are not available in hard copy, such as: Special Reports, Alphaville, editor blogs, education sections and much more! Subscriptions will start within 6-8 weeks of the start of class and are limited to one subscription per client. (Please note: as of May 1, 2011, the electronic subscription replaces the hard-copy 3-month Financial Times subscription.)

Advance Preparation

No advance preparation required.

Prerequisites

Participants should have a solid understanding of financial accounting and of Mergers and Acquisitions concepts and structures. A financial calculator is required.

Learning Objectives

Students will be able to:

- . Describe the equity method of consolidation
- . Account for equity method investments
- . Explain the tax considerations for equity method investments
- . Describe the impact of phantom goodwill or phantom depreciation
- . State the effect of not eliminating intercompany transactions
- . State the requirements for applying the Equity Method
- . Describe the fundamental concepts for accounting for business combinations using the purchase model
- . Determine a target's net identifiable assets by adjusting for existing goodwill, long-term asset write-ups and write-downs, LIFO inventories, deferred tax items, and fees
- . Determine how net operating loss limitations may impact the combined company's future cash flows
- . Calculate the acquisition purchase price and transaction goodwill
- . Account for negative goodwill by allocation and recognition of extraordinary gains
- . Estimate the impact of target's unrecognized intangible assets on goodwill and the combined company's future earnings
- . Calculate the accretion and dilution of future earnings resulting from business combinations
- . Explain the mechanism of an IRC 338(g) transaction
- . Describe the conditions that make a 338(g) transaction economically feasible
- . Explain the mechanism of an IRC 338(h)(10) transaction
- . Describe the conditions that make a 338(h)(10) transaction economically feasible
- . Explain how the Aggregate Deemed Sales Price and Adjusted Grossed-Up Basis are determined
- . Determine the Seller's and Buyer's ranges of indifference

Alumni Comments

"The depth analysis of accounting M&A deals"

"Right level of detail and content selection"

"It was content specific"

Level: Intermediate
