

Sarbanes Oxley - Online

The series of corporate financial scandals that took place in the United States has led to the framing of new legislation called Sarbanes-Oxley Act that strengthens corporate governance and restores investor confidence and eliminates corporate corruption and fraud.

The law was intended to bolster public confidence in the nation's capital markets and imposes new duties and significant penalties for non compliance on public companies and their executives, directors, auditors, attorneys and securities analysts.

This is an online self study course that can be globally accessed 24/7 from any internet enabled computer.
